

## **Event Card Rules**

These instructions replace the *Exhausted Cards* paragraph in the Valeria: Card Kingdoms Game Setup section, and append to the Action Phase. All other standard rules apply.

### **Exhausted Cards**

Take 1 Exhausted card per player and 1 Event card per player and shuffle them together. Place the shuffled cards in a stack above the Monster row. Return the rest to the box.

**NOTE:** If there is a specific Event card that you would like to play with, you may pre-select it as one of the Event cards to shuffle into the Exhausted card stack.

### **Action Phase**

After revealing an Event card, follow the text or rules on the Event card before moving on to the next Action or Phase. Any actions taken as a result of the Event card do not count as an Action.

## **Undead Samurai Rules**

The *Undead Samurai* cards can be used as an Event during the game or as a Monster stack you can add to the Monster row. The instructions below describe the rules changes for both. All other standard rules apply.

### **Playing As Event**

Following the Event Card Rules, shuffle the *Undead Samurai Lord* card with the Exhausted back into the Exhausted card stack. Place the *Undead Samurai* Monster cards face down next to the Exhausted card stack. During the game, when the *Undead Samurai Lord* is revealed, place it in the empty slot as usual, then starting with the Active player, and in turn order, each player places 1 *Undead Samurai* on a non-Exhausted stack of their choice. When the *Undead Samurai Lord* is slain, return any *Undead Samurai* still in the center stacks to the box.

### **Playing As Monster Stack**

Take the *Undead Samurai Lord* card with the Monster card back and the *Undead Samurai* Monster cards and set them up as described in the standard rules.
